

Arnco Solutions For Mining Equipment

arnco
The Tire Flatproofing Experts

Arnco Patented Technology

Underground Applications

SuperFlex® - 8 Durometer

- *Soft Air-Like Ride*
- *Greater Flotation, Improved Traction and Wider Footprint*
- *Maximum Tire Deflection*
- *Easier on Equipment & Operators*
- *Reduces Tire Carcass Impact Breaks*

Surface Applications

RePneu® - 28 Durometer

- *Arnco's Original Flatproofing Product - Can be Used in Most Mining Applications*
- *Best Heat Resistance*
- *Medium Tire Deflection*

RePneu II® - 30 Durometer

- *For Use in Moderate Duty Applications*
- *Medium Tire Deflection*
- *Provides Similar Benefits of RePneu*

HeviDuty® - 55 Durometer

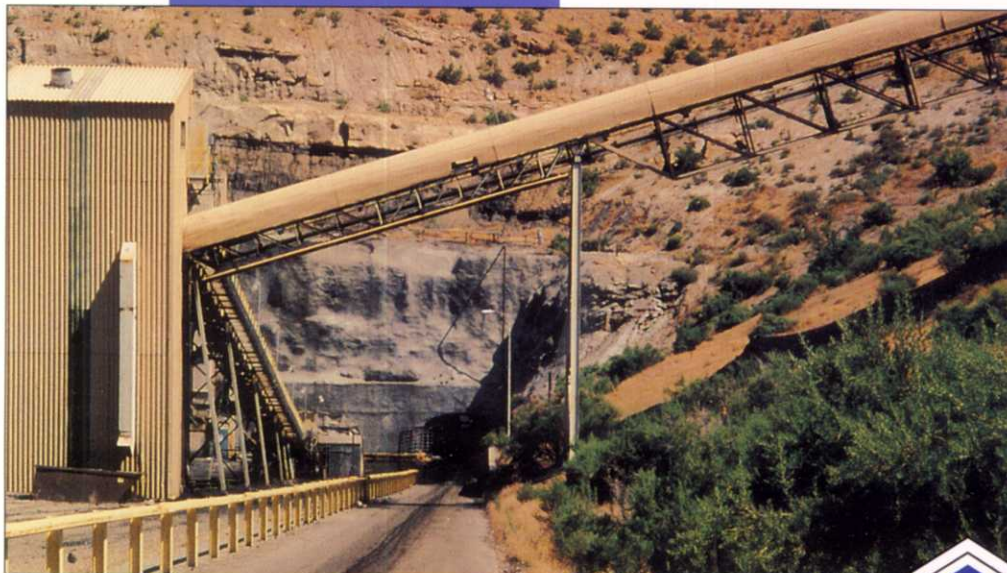

- *Designed for Big, Slow Moving Equipment*
- *Provides Rock-Steady Stability and Safety*
- *Ideal for Moving Tremendous Weights over Short Distances*
- *Minimum Tire Deflection*

Equipment/Product Chart

Equipment	SuperFlex®	RePneu®	RePneu II®	HeviDuty®
Shuttle Cars	○	●		
Scoops		●		●
Roof Bolters		●		●
Uni Haulers		●		
Scalers		●	●	●

Back Hoes	●			
Graders	●			

○ CONSULT WITH YOUR LOCAL ARNCO DEALER AS TO WHETHER YOUR EQUIPMENT CAN RUN ON THIS PRODUCT

No matter what the application, Arnco has the solution. With 4 different patented* flatproofing products, each designed to meet your particular load, ride, speed and traction requirements, Arnco will solve your Underground and Surface Mining tire needs.

*U.S. Patent # 4,416,844

Refer to Arnco's "Flatproofing Performance Warranty" for additional information on Service Cycles and Warranty Terms and Conditions.

The Tire Flatproofing Experts

Flatproofing Product Comparison

Compared to other flatproofing products - such as solid tires, cores, liners, chains, and sealants - Arnco's Flatproofing Material is the most cost effective method of eliminating flat tires. Compare the benefits below of Arnco Flatproofing to other flatproofing methods.

Constant Internal Pressure for Optimum Performance

Full Tire Life

Improved Heat Resistance

Distributes the Load Evenly

No Rim Slippage

More Tons Per Hour

Enhanced Ride

Improved Safety - No Blowouts

Better Traction

Proper Tire Flex

Retreadable

Will Not Void Most Tire Manufacturer's Warranty

For charts on Time/Temperature Profiles, Shock Absorption, Tire Footprint, Load Deflection, Flatproofing vs. Air refer to our Technical Brochure.

Flatproofing is a two part liquid polyurethane that is pumped into any pneumatic tire through its valve stem. The polymer replaces all the air in the tire and it cures into a soft rubber core that will never go flat!

NO FLAT TIRES - EVER!

For over 25 years, Arnco has been helping solve tire problems in the Mining Industry. No matter what your application, flatproofing your tires means the end to expensive tire-related repair costs, premature tire failure & down time. Flatproof just one piece of equipment today, we guarantee you will realize savings almost immediately.
